WHO CAN **JOIN THE COURSE?**

SIEM XPERT was created with an intention to offer a complete course that is specifically designed as per the current industry trends. Years of experience has helped us identify and understand the graduate-employee skills gap in the industry.

Freshers who want to start their career in Cyber Security.

People who have gap in their career and want to get high paying Jobs in MNCs.

People who are working on some other field and want to switch to Cyber Security.

Training gives best chance for them to reform their career and they will be able to perform the jobs like as an experience after this training.

People who are working in Cyber Security and wants to enhance their knowledge in SIEM and SOC.

SIEM XPERT
Learn. Secure. Succeed.

WHAT **YOU'LL BE LEARNING** IN THIS COURSE?

- SOC Team actually use SIEM tools to monitor the real-time threat activities so in this training we will cover 2 SIEM tools, Splunk SIEM and ArcSight SIEM.
- We will start from scratch of networking and security concepts to advance level so thew people who are not having any knowledge in networking or security or not even technical graduate they are also going to understand here.
- This training is completely Realtime training, what experienced SOC Analyst people are actually doing in the companies all we will be covering here practically and you will do the same thing on the Lab environment.
- You will be able to work like an experienced SOC Analyst, you can justify your experience during the interview and will be able to work in the companies without any issues.
- You will get lab access on ArcSight and Splunk tools for 75 days, which hardly you will get in any other institutes for SOC Analyst Training.
- You will get my customized book and many documents which we have created based on the Realtime work on the companies.

ABOUT **SIEM XPERT**

Company Profile

SIEM XPERT is the Global leader in Cyber Security Trainings and Services, having headquarter in Bangalore (Karnataka) and in operations since 2015.

We have helped more than 50000 people globally to start their career in a high demanding, high paying field of cyber security and helped them to change their lives.

Our partnership with numerous businesses that hire cyber security professionals allows us to recommend our trained students to them.

We have a world-class real-time company-type lab setup on several cyber security tools that allows students real-time hands-on practise so they can become ready to deploy and can deliver quality from day one. As a result, they are favoured by employers since they don't have to train them.

By providing corporate trainings we assist companies to enhance cyber security skills of their employees.

MISSION

Company Mission

As global market is having Cyber Security resources crunch hence our mission is to fulfill those open position by generating ready to deploy cyber security resources and give them real-time practical hands-on experience with the help of world class Cyber Security Lab.

We also aim to offer the best managed cyber security services to businesses so they can monitor their networks for cyber threats.
